Dawn -

I just spoke with Stephanie and she will gather the data for the  and sent it over to you very soon. We will have others shortly but this one is a bit of a rush. Please give me a call if you have any questions - thanks!

Ann (Breslin) DiDonato
On-Scene Coordinator

The metals concentrations at the [Ex. 6 - Personal Privacy] for aluminum, manganese, etc. and methane are about 1/2 of the concentrations as at the [Ex. 6 - Personal Privacy]. What we don't have is any organics data. We now have it for the [Ex. 6 - Personal Privacy] Trailer on one side and the [Ex. 6 - Personal Privacy] on the other side. We also don't know anything about the [Ex. 6 - Personal Privacy] well depth. The [Ex. 6 - Personal Privacy] is 500 feet deep according to the information gathered by DEP. (It is one of the deepest wells). [Ex. 6 - Personal Privacy] have had methane removal on since about April 2009. It seems to be doing a good job on the methane removal but not much on the metals; in fact some metals like barium are higher post treatment. From what I remember they have filters for metals removal, a tank for methane removal, followed by ozonation for bacteria, and they recently had a carbon filter added because they were having a "musty" taste. [Ex. 6 - Personal Privacy] residence is easily the most sampled residence for metals and methane, but not for much in the way of VOC or semi-volatile organics.

Will someone please answer my email? You see we actually use this water each and every day unlike the people who are being given water and have been for quite sometime. Don't we have a right to know what all you claim is in the water? Any idea how many people and times we are/have been asked if we drink it.? Now, do you and everyone else understand why we don't drink it? Will we/should we ever be comfortable using our water again when things like this continue to happen? Unlike these people who are being provided with water we actually used the contaminated water in the beginning because no one at all would do anything at all to help us. They wouldn't even tell us how we could obtain water on our own. Any idea what it's like to look out your window and see a media circus and a large tanker truck corking up the entire road.? Then, later you watch the news and see this story. I guess the EPA had no reason at all to tell us what was going on right? We just happen to live right next door to it all. The attorney for these litigants and the litigants continue to claim that our treatment system doesn't work. If it doesn't work we'd like to see the proof! Again, we are going to have a water test done here on Monday and would like to know everything that you think you have found in the water of these homes so we can have it tested for because we use this water unlike them. The EPA was supposed to come and speak with us on Sat. they were a no show. Instead of talking to us they placed a paper in our mailbox. Yet they had the time to go and speak with the neighbors and the press the day before. All we are asking is for a list of this contaminants and you can't even manage to do that.?

Thank you,

Ex. 6 - Personal Privacy

We received a paper in our mailbox today from you about water testing.(we were told that you people were actually going to come and speak with us) You were at the home next to us yesterday but didn't feel the need to come and speak with us and today you didn't feel the need to speak with us either. We actually use this water unlike the people you have decided need to be given water every day. Unlike these people we actually used the water when it was brown as well since we were told it was fine for us to use but not them.(No one including the EPA would give us water or even tell us how we could obtain it on our own) We are having a water test done on Monday and would like to have the water tested for whatever you think these people have in their water as well. (the EPA did make mention to us that our aquifers are prob. connected) We need to have that information from you now so we are able to have it added to the test. We would like to have this information today! I would also not like you to send out another blanket email that gives these people our email address or any information about us. We were not given the paper that we needed to sign for the EPA to do the water test on our well on Thur. either. We are tired of people asking why we don't drink our water. Would you want to drink it if the home next to yours needs to be provided with water each and every day.? We've also had a past issue with the DEP when they claimed we didn't need to be provided with water but they hadn't read the testing results correctly. We want the water tested by the EPA,Cabot and ,DEP on Thur. I also left you a message on your work number.

Thank you very much,

Ex. 6 - Personal Privacy
